

Ziv Ashkenazi

Rishon LeZion | (054)-943-6465 | Ziva9529@gmail.com | [LinkedIn](#) | [GitHub](#)

Full Stack Developer with 3 years of experience building and shipping production web apps using Node.js (TypeScript) and React. **Problem solver** who owns features end-to-end from system design and APIs to data(PostgreSQL/MongoDB), CI/CD and cloud deployment on Azure.

Experience

Lead Full Stack Developer at Ness Technologies

05/2024 - Present

- **Led and mentored 6 engineers**, driving delivery through ownership, prioritization, and high-signal code reviews; established engineering standards and knowledge-sharing practices that improved consistency and reduced rework.
- Redesigned CI/CD on Azure DevOps, implementing security gates and Docker hardening to ensure **full visibility into High/Critical alerts before production** and enforce remediation prior to release.
- Drove end-to-end performance improvements across the stack by optimizing client-side rendering and introducing Redis caching on hot paths - improving perceived responsiveness and API latency by **~35%**.
- Owned operational readiness for a **high-governance system** serving **1,000+ enterprise users**, maintaining 99.9% uptime through strict security and release protocols, and reliably executing critical releases under tight deadlines while preserving production stability.

Full Stack Developer at Ness Technologies

02/2023 - 05/2024

- Built data-ingestion services in Node.js (**TypeScript**) and Python. Translating complex business logic into efficient ingestion services that handle high-volume data processing for MongoDB and PostgreSQL.
- Developed interactive data visualization tools using React, allowing users to efficiently analyze complex datasets through dynamic tables and dashboards.
- Engineered robust **RESTful APIs** and scalable microservices using Node.js (TypeScript) and Python, implementing secure authentication/authorization flows and strict API contracts to ensure seamless frontend integration.
- Established core Docker & Azure infrastructure and modernized legacy codebases. Enforced Strict TypeScript and Clean Code standards, reducing runtime errors by ~25% and accelerating deployment cycles.

Military Service

Procurement Team Leader at Israeli Military Intelligence

09/2021 - 09/2022

- Led a 2-person team; trained and mentored teammates while delivering under tight deadlines.

Technical Procurement Team Member at Israeli Military Intelligence

02/2019 - 09/2021

- Managed vendor partnerships and contracts with Microsoft, IBM, and Check-Point and more; received unit outstanding recognition for impact on a major project.

Technical Knowledge

- Languages: TypeScript, JavaScript, Python, SQL.
- Backend & Architecture: Node.js, NestJS, Microservices, RESTful APIs, System Design.
- Frontend: React.
- Data: PostgreSQL, MongoDB, Redis (Caching).
- Cloud & DevOps: Azure, Docker, CI/CD (Azure DevOps), Git.
- Security & Concepts: Authentication (OAuth/JWT), Clean Code, SOLID principles, Agile/Scrum.

Education

B.Sc. In Computer Science at Holon Institute of Technology

10/2023 - 06/2026

- GPA: 96, honored on the Dean's List.

Full-Stack Bootcamp course at John Bryce Hi-Tech College

09/2021 - 09/2022

- Web applications fundamentals and best practices.

Languages

English - Full professional proficiency; **Hebrew** - Native
